1. The following is an examiner's statement of reasons for allowance: The instant claims are considered to be allowable over the prior art of record in that such art does not disclose, teach or suggest the overall aspects of locking a top mold half to a segmented bottom mold having a plurality of segments using a lock ring which is positioned around the segments, the lock ring being provided by being lowered using the instant lock frame and lock cylinder wherein the ring is selectively connected and disconnected to the frame with lock rods which are rotated by lock motors on the lock frame to provide a quick connect and disconnect from the lock ring. Lesneski was uncovered in an updated search and discloses connecting rods (135) which pass through a lock ring (122). However, these rods are not rotated to effect connection and disconnection to the ring and the reference therefore does not teach a lock motor to perform the rotation. The prior art cited on the 1449 of July 19, 2004 has been carefully checked and none of the references teach this structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
